The Intel Technology and Manufacturing Research Team in Ireland has a mission. Its dedicated researchers believe that Ireland will be a leader in technology and manufacturing research, so they collaborate with research institutes, universities and other companies across Europe to make this happen.

Current areas of investigation for the team include: semi-conductor manufacturing (such as advanced process control and energy efficiency) and nanotechnology (including research into nano-materials synthesis and integration, nano-photonics and silicon spintronics).

Location

Block 2, Brookvale Plaza
Shannon Ireland
52° 42' 44.8956" N, 8° 52' 23.0448" W
