

Can I add items to the navigation menu, sub-menus, etc.?

Wed, 2010-01-20 17:00 - [Lukas Theussl](#) [1]

Only authorized users have the permission to change the navigation menu. If you are responsible for some part of the site, eg for a group's or project's web pages, and want to change the navigation menu, you should [contact](#) [2] our web master and ask for the proper permission setup.

Once you have the proper permissions you can add a menu item by submitting (or editing) a page and indicating the correct parent menu under 'Menu settings'. For security reasons, it is currently not possible for normal users to remove a menu item, please contact a web master to do this for you.
