There are postdoc positions available in Mathematical Physics/Quantum Information Theory in the Department of Mathematics at the Technical University in Munich (Germany). Applicants should be

- mathematicians, theoretical physicists or computer scientists,
- interested in mathematical physics, theoretical computer science, quantum information theory and/or other fields of quantum theory and its foundations,
- willing to contribute to undergraduate math education.

The positions are within the groups of Prof. Michael M. Wolf and Prof. Robert Koenig in the research unit mathematical physics. They are available starting mid-January 2015 with a flexible starting date. Candidates will be considered until all positions are filled. Applications (sent to tum [dot] qit [at] gmail [dot] com) should include a CV, a short research statement, a list of publications and the names and contact details of senior scientists who could provide letters of recommendation.
