

The QUTE-EUROPE Virtual Facilities

As part of its mission, QUTE-EUROPE is committed to providing a framework for interaction and coordination with the scientific branches of the research community. Along with the five Virtual Institutes, the framework architecture is structured around a set of two Virtual Facilities (VFs):

- [Virtual Facility for Quantum Control](#)
- [Virtual Facility for Quantum Engineering](#)

Each Virtual Facility unites some prominent experts in the corresponding field, providing a contact point for consultation and feedback in the relevant areas.

Virtual Facility	Engineering	Control
Director	C. Marcus	S. Glaser
Executive Secretary	J. Morton	F. Wilhelm

A centralized point of contact and representation for all VFs is available through the Head of the Directorial Board, Antonio Acín (ICFO, Barcelona).
