The Institut Quantique (IQ) of Université de Sherbrooke brings together internationally recognized leaders in research and interdisciplinary training in science and quantum technologies. The IQ is a collaborative environment at the interface of quantum computing, quantum materials and quantum engineering offering exceptional scientific and professional perspectives to its students, members and partners.

In 2015, the Canada First Research Excellence Fund (CFREF) awarded \$33.5 million over the next seven years to our researchers to support the “From Quantum Science to Quantum Technologies” project. This ambitious strategy will undoubtedly be one of the great industrial revolutions of the 21st Century.

Leader: Alexandre BLAIS

Location

Université de Sherbrooke 2500 Boul. de l'Université
Sherbrooke J1K 2R1 Canada
