

Quantum Technology Group

Tue, 2017-02-07 11:50 - [Lars M. Johansen](#) [1] **Website:**
www.usn.no/qt [2]

Research Type: Theory

Technological developments enable us to manipulate and control quantum effects at an increasingly advanced level of sophistication. This gives new opportunities e.g. within communication, metrology, sensors, simulation and computation. Quantum technology will affect global communication networks and security on the internet.

Our research is concentrated on quantum mechanical measurement theory and quantum metrology, quantum opto-mechanics, quantum optics, entanglement, nonlocality and quantum information.

Leader: Lars M. Johansen

Location

University College of Southeast Norway Hasbergsvei 36
Kongsberg 3616 Norway
Phone: (+47) 31 00 89 53
